

Heart Lips my passion!

I increasingly see younger women looking to enhance their appearance with lip augmentation.

One of the biggest problems with lip treatments today is that they have the potential to make lips look unnatural. We've all seen the 'trout pout' and the over-augmented 'rubber tyre' look. A good treatment should always ensure that the lips are in harmony, balance and proportion with the overall size and shape of the face.

Heart Shaped lips is aimed at women who desire a more voluptuous, more feminine, yet beautifully natural look.

Looking younger and healthier has never been more achievable. Improving your appearance is now simpler and quicker than ever.

Wrinkle Correction

In cosmetic applications, a **Botox injection**, consisting of a small dose of botulin toxin, can be used to prevent development of wrinkles by reducing facial muscles activity. The result will last up to 4 months.

Patients interested in Botox should be between 18 and 65 years old.

During your consultation, I may ask you about your skin care regimen and examine the areas of your face you wish to have treated. From this examination, I will choose.

specific points of injection that will optimize the Botox treatment and ensure you get an ideal cosmetic result when you leave the practice.

Treated areas of the face with Botox:

- ◆ **Forehead.**
- ◆ **Between Eyebrows (Glabella region),**
- ◆ **Outer Sides of the Eyes (Crow's feet).**
- ◆ **Bunny lines.**
- ◆ **Depressed corner of the mouth.**
- ◆ **Aging neck and décolleté area.**
- ◆ **Gummy smile (excessive elevation of the upper lip during smile).**
- ◆ **Excessive sweating underarms.**

Injectable dermal fillers can plump thin lips, enhance shallow contours, soften facial creases, remove wrinkles and improve the appearance of recessed scars. Although they can't help with excess sagging skin, these soft tissue fillers can add more volume and provide immediate results at a lower cost than surgery. These treatments aren't permanent , they can last up to 12 months.

Some dermal fillers are used in conjunction with other skin rejuvenation treatments such as injections of Botox.

Range of fillers currently offered:

Teosyal, restylan, Juvaderm
